Fascinated about Fragrance & Perfumery? Want to know more?!

Come along to our Perfume Training Workshop to smell & discover more about perfume and perfumery.

With lots of practical smelling & real world examples of ingredients and perfumed products, we will explore perfume and all it entails.

Starting with raw materials and how we smell, we'll then explore the job the perfume does. It's not just a pretty smell! What makes a perfume 'right' for a person, a product or a package? How are fragrances created in a modern day Perfume House? In addition we'll visit the technical & creative requirements and undertake a fragrance creation exercise.

The work shop is organised and given by Penny Williams, a fully qualified Perfumer, full member of the British Society of Perfumers and experienced, enthusiastic trainer.

Perfume Training Workshop includes:

- The art & science of perfumery
- Perfume: more than just a smell
- How we smell
- What makes our fragrance preferences unique
- Creative perfumery & techniques
- Practical smelling techniques
- Fragrance evaluation & selection
- Perfume Creation Practical
- Many things to smell!

Refreshments & light lunch provided
